CLAY04

Duration:

1 Full Day

Who should attend:

Ideal for a person looking at creating their own stop motion animation film, 3D animation or both. The first part of this workshop will teach you the techniques to create your very own stop motion animation film. At the conclusion of this course participants should be able to understand how the software package works to build a stop motion film and what resources are required to build one. The second part of this workshop is ideal for a person looking at creating a rich 3D multimedia presentation. The final product can then be saved as a Quick- Time video or avi. Kahootz brings a new and simple approach to developing rich interactive 3D multi media presentations. At the conclusion of this course participants should be able to understand how the software package works to build 3D worlds with objects and characters that move within these worlds.

Course Pre-requisites:

Participants should be familiar with working in a Windows environment and have a general computer working knowledge.

Related Courses:

Why not extend on what you have learned in this course, and gain the skills needed to unleash the full power of other products and applications. Envisage Training's basic, intermediate, and advanced courses will provide you with the training needed to give
